Current status, motivation

We would definitely need help from hardcore SWOS legends and enthusiasts who would be able to provide most of the hardwares for the tournament, as we currently own only one Amiga computer. We think, that with good organization and logistics we can overcome this bottleneck and organize a great event for the community. As we have already some experience from previous tournaments and based on the fact, that smaller communities (e.g. Bulgarian or Dutch team) were already able to organize such an event, we think, that our small but determined team would be a perfect choice for next years Sensi Days! We invite you to our beautiful country and capital!

DAYS MUST GO ON!
